Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed primarily because the broadest claim has been amended to specify a c:a ratio (ligand L^2 to BF_3) of from 0.01 to *less than* 0.5 (Claim 1, penultimate line). The amendment eliminates any overlap in catalyst composition vis-à-vis the Research Disclosure article and neither the article nor the Rath patent provides motivation to select a boron trifluoride complex with an L^2 to BF_3 ratio within the claimed range for preparing polyisobutene having a content of terminal vinylidene groups of at least 75 mol %. In this regard, applicants' arguments (Reply, pp. 7-8) are well taken and the prior art rejection is withdrawn.

Accordingly, claims 1-13 are deemed to define allowable subject matter and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Art

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

CN '841 (English language translation) is cited as pertinent to an initiator system for preparing living polyisobutylene, consisting of BF_3 and an organic ligand, the ligand

Art Unit: 1713

being an organic compound consisting of carbonyl group or ester group structures and the mole ratio of ligand to BF_3 being 0.5 to 3.0 (translation, pp. 2 and 7). A ligand to BF_3 ratio of less than 0.5 is neither taught nor fairly suggested therein.
